

American College of Physicians Genesis Registry, Powered by Premier, Inc. QCDR Measure Specifications

2019 QCDR Measure IDs	Measure Title	Measure Description	Denominator	Numerator	Denominator Exclusions	Denominator Exceptions	QCDR Measure Type	Change(s) Made to 2019 Measure (if Applicable)	NQF ID Number (if applicable)	Is the QCDR measure a high priority ?	High Priority Type	Measure Type	NQS Domain	Meaningful Measure Area	Traditional vs. Inverse Measure	Proportional Measure	Continuous Variable Measure	Ratio Measure	Number of performance rates to be calculated and submitted	Risk-Adjusted
ACPGR1	High Risk Pneumococcal Vaccination	The percentage of patients aged 19 through 64 with a high risk condition, who either received a pneumococcal vaccination OR who reported previous receipt of a pneumococcal vaccination.	Patient aged 19 through 64 with a high risk condition (e.g., diabetes, heart failure, COPD, end-stage kidney disease, nephritic syndrome, chronic kidney disease, chronic dialysis, asplenia, malignancy, solid organ transplant, on immunosuppressive medications, HIV, cystic fibrosis) and a valid patient encounter code.	Patients who received a pneumococcal vaccination OR who reported previous receipt of a pneumococcal vaccination.	None	Pneumococcal vaccination not received with medical reason(s) (e.g., patient allergic reaction, potential adverse drug reaction) or patient reason(s) (e.g., patient refusal) documented.	Existing Approved QCDR Measure With Changes	Updated the denominator exception	N/A	No	N/A	Process	Community/Population Health	Preventive Care	Traditional	Yes	No	No	1	No
ACPGR2	Tdap (Tetanus, Diphtheria, Acellular Pertussis) Vaccination	Percentage of patients aged 19 or older who received a primary vaccine series of tetanus/diphtheria/acellular pertussis (tdap) vaccine OR who reported previous receipt of Tdap booster vaccination.	Patients aged 19 or older with a valid patient encounter code during the measurement period.	Patients who received Tdap vaccination OR who reported previous receipt of Tdap booster after the age of 19.	None	Tdap vaccination not received with reason(s) documented (e.g., vaccination not indicated/patient refusal).	Existing Approved QCDR Measure With Changes	Added "during the measurement period." to the denominator.	N/A	No	N/A	Process	Community/Population Health	Preventive Care	Traditional	Yes	No	No	1	No
