

QCDR Vendor ID	QCDR Organization Name	Measure ID	Measure Title	Measure Description	NQS Domain	Numerator	Denominator	Denominator Exclusions	Denominator Exceptions	Numerator Exclusion	Number of performance rates to be included in the XML	Indicate an Overall Performance Rate if more than 1 performance rate is to be submitted. Specify which rate will represent an overall performance rate for the measure or how an overall	Measure Types	High Priority	Outcome	Inverse Measure (Y/N)	Proportional Measure (Y/N)	Continuous Variable Measure (Y/N)	Ratio Measure (Y/N)	Risk-Adjusted (Y/N)
1233222	National Home Based Primary Care and Palliative Care Registry	NHBP2	Alcohol Problem Use Assessment for Home-Based Primary Care and Palliative Care Patients	Percentage of newly enrolled and active home-based primary care and palliative care patients who were assessed for a problem with alcohol use at enrollment.	Community/Population Health	Number of newly enrolled and active home-based primary care and palliative care patients who were assessed for a problem with alcohol use at enrollment.	Total number of newly enrolled* and active home-based primary care and palliative care patients. * A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period. The enrollment period includes 90 days from the first recorded new patient E&M visit code with the practice	Patients who are dependent on their feeding activity of daily living (ADL).	Patients who are newly enrolled less than 90 days before the end of the measurement period.	None	N/A	N/A	Process			N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBP3	Depression Symptom Assessment for Home-Based Primary Care and Palliative Care Patients	Percentage of actively enrolled home-based primary care and palliative care patients who were screened for the presence of depression symptoms at enrollment and annually.	Community/Population Health	Number of actively enrolled home-based primary care and palliative care patients who were assessed for depression symptoms at enrollment and annually.	Total number of actively enrolled* home-based primary care and palliative care patients. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period. The enrollment period includes 90 days from the first recorded new patient E&M visit code with the practice.	None	Patients who are newly enrolled less than 90 days before the end of the measurement period.	None	N/A	N/A	Process			N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBP4	Pain Screen for Home-Based Primary Care and Palliative Care Patients	Percentage of home-based primary care and palliative care visits at which a patient was screened for the presence of pain.	Community/Population Health	Number of visits to actively enrolled home-based primary care and palliative care patients at which a pain screen was performed.	Total number of home visits to actively enrolled* home-based primary care and palliative care patients. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period.	None	None	None	N/A	N/A	Process			N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBP5	Depression Treatment Plan for Home-Based Primary Care and Palliative Care Patients Who Screen Positive for Depression	Percentage of actively enrolled home-based primary care and palliative care patients who screen positive for depression symptoms and have a treatment plan** for depression.	Effective Clinical Care	Number of actively enrolled home-based primary care and palliative care patients who screen positive for depression symptoms and have a treatment plan** for depression. ** A treatment plan for depression must include at least one of the following: additional evaluation, suicide risk assessment, referral to a practitioner who is qualified to diagnose and treat depression, pharmacological intervention, or other interventions or follow-up for the diagnosis or treatment of depression.	Total number of actively enrolled* home-based primary care and palliative care patients who screen positive for depression. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period.	None	None	None	N/A	N/A	Process			N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBP6	Screen for Risk of Future Fall for Home-Based Primary Care and Palliative Care Patients	Percentage of actively enrolled home-based primary care and palliative care patients who were screened for risk of future fall at enrollment and annually.	Patient Safety	Number of actively enrolled home-based primary care and palliative care patients who were screened for risk*** of future fall** at enrollment and annually. **A fall is defined as a sudden, unintentional change in position causing one to land at a lower level, on an object, the floor or the ground other than as a consequence of a sudden onset of paralysis, epileptic seizure or overwhelming external force. *** Risk of future falls is defined as having had 2 or more falls in the past year or any fall with injury in the past year.	Total number of actively enrolled* home-based primary care and palliative care patients. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period. The enrollment period includes 90 days from the first recorded new patient E&M visit code with the practice.	None	Patients who are newly enrolled less than 90 days before the end of the measurement period.	None	N/A	N/A	Process	High Priority		N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBP7	Delirium Assessment in Home-Based Primary Care and Palliative Care Patients: Medication List Reviewed & Offending Medications Discontinued (Multiple-Performance-Rate Measure)	Percentage of actively enrolled home-based primary care and palliative care patients with new diagnosis of altered mental status, delirium, or new or unexpected cognitive decline whose medication lists were reviewed for possible offending medications and whose use of medications was discontinued or justified. This measure will be calculated with two rates: 1) Percentage of patients whose medication lists were reviewed for possible offending medications. 2) Percentage of patients with offending medications whose use of offending medications was discontinued or justified.	Effective Clinical Care	This measure has two rates. a) Number of actively enrolled home-based primary care and palliative care patients with a new diagnosis of altered mental status, delirium, or cognitive decline whose medication regimens were reviewed for possible offending medications for altered mental status, delirium, or cognitive decline. b) Number of actively enrolled home-based primary care and palliative care patients with a new diagnosis of altered mental status, delirium, or cognitive decline whose offending medications were discontinued or continued use justified.	This measure has two denominator criteria: A. Total number of actively enrolled* home-based primary care and palliative care patients with a new diagnosis of altered mental status, delirium, or cognitive decline. B. Total number of actively enrolled* home-based primary care and palliative care patients with a new diagnosis of altered mental status, delirium, or cognitive decline with an offending medication identified. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period.	None	None	None	2	Performance Rate 2	Process			N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBP9	Referral to Hospice for Appropriate Home-Based Primary Care and Palliative Care Patients	Percentage of actively enrolled home-based primary care and palliative care patients with a prognosis of 6 months or less who were offered referral to hospice.	Person and Caregiver-Centered Experience and Outcomes	Number of actively enrolled home-based primary care and palliative care patients with a prognosis of 6 months or less who were offered referral to hospice.	Total number of actively enrolled* home-based primary care and palliative care patients with a prognosis of 6 months or less. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period.	None	None	None	N/A	N/A	Process	High Priority		N	Y	N	N	N

1233222	National Home Based Primary Care and Palliative Care Registry	NHBPC10	Telephone Contact, Virtual, or In-person Visit Within 48 Hours of Hospital Discharge of Home-Based Primary Care and Palliative Care Patients	Percentage of actively enrolled home-based primary care and palliative care patients who had a telephone contact, virtual, or in-person visit within 48 hours of hospital discharge.	Communication and Care Coordination	Number of actively enrolled home-based primary care and palliative care patients discharged from the hospital to home with a follow-up telephone contact, virtual or in-person visit documented within 48 hours of hospital discharge.	Total number of actively enrolled* home-based primary care and palliative care patients discharged from the hospital to home. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period.	Patients at hospital for emergency department visit only or who were at hospital under observation status only.	None	None	N/A	N/A	Process	High Priority		N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBPC11	Medication Reconciliation Within 2 Weeks of Hospital Discharge of Home-Based Primary Care and Palliative Care Patients	Percentage of hospitalizations in which actively enrolled home-based primary care and palliative care patients are discharged home and medications were reconciled in the practice medical record within 2 weeks of hospital discharge.	Efficiency and Cost Reduction	Number of hospitalizations in which actively enrolled home-based primary care and palliative care patients are discharged home and medications reconciled in the practice medical records within 2 weeks of hospital discharge.	Total number of hospitalizations of actively enrolled* home-based primary care and palliative care patients discharged from the hospital to home. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period.	Patients at hospital for emergency department visit only or who were at hospital under observation status only. Hospitalizations associated with hospital readmission within 2 weeks of discharge. Hospitalizations during which patient died. Hospitalizations resulting in discharge to institutional care.	None	None	N/A	N/A	Process	High Priority		N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBPC13	Interdisciplinary Team Assessment for Home-Based Primary Care and Palliative Care Patients	Percentage of newly enrolled and active home-based primary care and palliative care patients who were discussed by an interdisciplinary team** at enrollment. **Interdisciplinary team must include, at minimum, the following disciplines: MD or NP or PA, nursing, and social work.	Communication and Care Coordination	Number of newly enrolled and active home-based primary care and palliative care patients who were discussed by an interdisciplinary team** at enrollment. **Interdisciplinary team must include, at minimum, the following disciplines: MD or NP or PA, nursing, and social work.	Total number of newly enrolled* and active home-based primary care and palliative care patients. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period. The enrollment period includes 90 days from the first recorded new patient E&M visit code with the practice.	Patients who are newly enrolled less than 90 days before the end of the measurement period.	None	None	N/A	N/A	Process	High Priority		N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBPC14	Cognitive Assessment for Home-Based Primary Care and Palliative Care Patients	Percentage of actively enrolled home-based primary care and palliative care patients who received an assessment of their cognitive ability.	Effective Clinical Care	Number of actively enrolled home-based primary care and palliative care patients whose cognitive status was assessed at enrollment and annually.	Total number of actively enrolled* home-based primary care and palliative care patients. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period. The enrollment period includes 90 days from the first recorded new patient E&M visit code with the practice.	Patients who are newly enrolled less than 90 days before the end of the measurement period.	None	None	N/A	N/A	Process			N	Y	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBPC15	A Functional Assessment (Basic and Instrumental Activities of Daily Living [ADL]) for Home-Based Primary Care and Palliative Care Patients (Multiperformance Measure)	Percentage of actively enrolled home-based primary care and palliative care patients who received basic ADL assessments and IADL assessments at enrollment and annually. This measure will be calculated with three rates: 1) Percentage of patients who received a basic ADL assessment 2) Percentage of patients who received an IADL assessment 3) Percentage of patients who received both a basic ADL and IADL assessment (overall rate)	Effective Clinical Care	A) Number of actively enrolled home-based primary care and palliative care patients who were assessed for basic ADL impairment at enrollment and annually B) Number of actively enrolled home-based primary care and palliative care patients who were assessed for IADL impairment at enrollment and annually C) Number of actively enrolled home-based primary care and palliative care patients who were assessed for both ADL and IADL impairment at enrollment and annually	Total number of actively enrolled* home-based primary care and palliative care patients. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period. The enrollment period includes 90 days from the first recorded new patient E&M visit code with the practice.	Patients who are newly enrolled less than 90 days before the end of the measurement period.	None	None	3	Performance Rate 3	Process		Y	Y	N	N	N	N
1233222	National Home Based Primary Care and Palliative Care Registry	NHBPC16	Patient Reported Outcome for Home-Based Primary Care and Palliative Care Practices: Provider Trust	Percentage of actively enrolled home-based primary and palliative care patients who report that their provider is caring and inspires trust.	Communication and Care Coordination	Number of actively enrolled home-based primary and palliative care patients who report that their provider is caring and inspires trust	Total number of actively enrolled* home-based primary care and palliative care patients who report the outcome. *A patient is considered actively enrolled if they have at least 2 E&M visit codes with a provider from the practice within the reporting period.	Patient unable to communicate with no proxy and patients who do not respond to the survey / query.	Patients who are newly enrolled less than 90 days before the end of the measurement period.	None	N/A	N/A	Patient Reported Outcome	High Priority	Patient Reported Outcome	N	Y	N	N	N
