**Measure Description**

Percentage of patients aged 18 and older receiving a checkpoint inhibitor (ICPi) Medications – Atezolizumab – Avelumab – Durvalumab – Ipilimumab – Nivolumab – Pembrolizumab – Axitinib – Bevacizumab – Xeloda® – Gemcitabine – Capecitabine – Lapatinib – Sunitinib who have at least 1 PCR test performed with the most recent result equal to or greater than MR2 (BCR-ABL1 transcript level <= 1% [IS]) during the measurement period.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have at least 1 PCR test performed with the most recent result equal to or greater than MR2 (BCR-ABL1 transcript level <= 1% [IS]) during the measurement period.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.

Percentage of patients aged 18 and older seen in the outpatient setting who have been receiving TKI therapy for at least 6 months, who are receiving TKI therapy for at least 6 months for at least 90 days apart, where the most recent total score indicates the form (Version 1.2) at least twice during the measurement period at least 90 days apart, where the same tool was used for both assessments.
