Measures for Quality & Performance Improvement

MEASURES FOR PERFORMANCE & QUALITY IMPROVEMENT (NON-QCDR MEASURES)

MEASURE ID

Assessment and Intervention for Psychosocial Distress in Adults Receiving Cancer Treatment

ONSQIR1

Percentage of patients aged 18 years and older with a diagnosis of cancer who are assessed for psychosocial distress, and if moderately to severely distressed, have a documented intervention during the measurement period.

Recommendation for Exercise to Adult Cancer Survivors

ONSQIR2

Percentage of patients aged 18 years or older with a diagnosis of cancer who received a documented recommendation for a program of exercise at any visit during the measurement period.

Assessment and Intervention for Sleep-Wake Disturbance During Cancer Treatment

ONSQIR3

Percentage of chemotherapy cycles for patients aged 18 years and older with a diagnosis of cancer where a sleep-wake disturbance assessment is documented, and if moderate to severe disturbance is reported, an intervention for sleep-wake disturbance is documented.

Education on Neutropenia Precautions

ONSQIR5

Percentage of patients aged 18 years and older receiving intravenous chemotherapy who received education on neutropenia precautions prior to or at the time of the first chemotherapy administration. Instructions include hand washing and to contact health care provider of a fever of 101.0 or greater.

Post-Treatment Education

ONSQIR6

Percentage of patients aged 18 years and older for whom four critical areas of patient education regarding lifestyle, late effects and cancer recurrence have been provided or reinforcement of prior education has occurred.

Psychosocial Distress Improvement

ONSQIR8

Percentage of patients aged 18 years and older who had moderate or greater psychosocial distress at baseline (end of cancer treatment) and report improvement in psychosocial distress from baseline to most recent visit in during the 12 month period after completing the final component of the treatment plan.

QCDR MEASURES FOR MIPS & QI

MEASURE ID

Goal Setting and Attainment for Cancer Survivors

ONSQIR18

Percentage of patients aged 18 years and older who completed the final component of cancer treatment that have at least one post-treatment goal documented and progress of goal attainment documented within 12 months of completing the final component of cancer treatment.

Fatigue Improvement

ONSQIR20

Percentage of patients aged 18 years and older with a diagnosis of cancer who reported moderate or greater level of fatigue at baseline who report mild or clinically insignificant fatigue during the 12-month measurement period.
